# Code Duplicate Remover - USER MANUAL

Requirements

- Resharper Installed In Visual Studio with Resharper keyboard shortcuts enabled.

To enable resharper shortcuts

Open Visual Studio →Extensions → Resharper →Options →Keyboard →Shortcut scheme → Select **Intellij Idea** as shortcut scheme → Apply scheme →Save

Removing a Duplicate

1. Copy the *Code Duplicate Remover.exe* File to the ComTests Directory
2. Open and keep *CommonTests.sln* file inside Visual studio.
   Note: Confirm that only one instance of Visual studio with the above file is running while using the *Code Duplicate Remover.exe* application.
3. Run *Code Duplicate Remover.exe* file→ Click on remove duplicate
   Note: Don't interrupt the process by anyway(Don't use the keyboard or mouse.) after clicking on removing duplicate button. Wait till the duplicate removal is over.
